## CONFLICT OF INTEREST STATEMENT

It is the policy of **Acta Medica Medianae (AMM)** that every individual author who either submits or reviews a manuscript for publication in AMM discloses any financial, professional, proprietary, or any other personal or institutional interests that may influence positions, opinions and results presented in a manuscript or a review.

Journal Acta Medica Medianae is committed to upholding the highest standards of publication ethics and takes all possible measures against any publication malpractices (for more details see [Clinical and Experimental Work Code](#)). All authors submitting their papers to AMM for publication as original articles attest that the submitted works represent their contributions and have not been copied or plagiarized in whole or in part from other works. The authors acknowledge that they have disclosed all and any actual or potential conflicts of interest with their work or partial benefits associated with it.

AMM requires that each author in the process of publication and review completes this form.

We below signed authors declare that we fulfilled authorship criteria and declare that we do not have conflict of interest and that our manuscript meets the ethics standards as requested by Journal.
