

Reč urednika

Pred nama je drugi broj časopisa „Studentski Medicinski Glasnik“. Ideja časopisa je od osnivanja bila promocija naučno-istraživačkog rada studenata. Nadamo se da će ovaj i naredni brojevi poslužiti da se stvori kontinuitet i da SMG postane jedan prepoznatljivi simbol studenata Medicinskog fakulteta u Nišu. Dalji ciljevi uredništva SMG-a su poboljšanje kvaliteta radova koji će biti objavljeni, podsticanje studenata koji se do sada nisu bavili naučno istraživačkim radom da se oprobaju u tome, ali i povezivanje i saradnja sa drugim časopisima i uvrštavanje u referentne baze podataka.

U ovom broju časopisa objavljeni su neki od najboljih studentskih radova napisanih u prethodnih godinu dana. Takođe, objavljeno je i nekoliko revijskih radova napisanih od strane profesora sa Medicinskog fakulteta.

Dugujemo veliku zahvalnost svim studentima koji su prijavom svojih radova doprineli stvaranju ovog časopisa; zatim profesorima koji su izdvojili vremena da napišu revijske radove na aktuelne teme za ovaj časopis; kao i računarskom centru, upravi fakulteta i dekanu na podršci ovom časopisu.

From the Editor

Before us is the second issue of "Journal of Medical Students." The idea of founding a magazine was to promote scientific research students. We hope that this and future numbers used to create continuity and SMG to become a recognizable symbol of students of the Faculty of Medicine. Further objectives Editorial SMG's are improving the quality of works that will be released, encouraging students who have not engaged in scientific research to try this, but the networking and cooperation with other magazines and inclusion in the reference database.

In this issue of the magazine published some of the best student papers written in the past year. Also, it was announced a few review articles written by professors from the Faculty of Medicine.

We owe a big thanks to all the students who are logging their work contributed to the creation of the magazine, then teachers who are taking the time to write the review papers on current topics for the magazine, as well as the computer center, the dean of the faculty and administration for their support to this journal.
